

iCAN provides a unique opportunity to start your own business in the field of recharge mobile phones and receive other payments..

Buying our machines you can immediately start to accept payments and earn up to 6% of all payments. For this purpose you need only one space for m2 and free outlet. With us you will be free from all sorts of dusty and sweaty work and become the proud owner of a high-terminology, civilized and very prestigious business. In your surroundings, and especially in the eyes of your customers you are an authorized person, who is entrusted to accept payments in favor of the large companies, banks and public authorities.

High profitability
up to 6%

All in one - Wide range of services

Our machines allow you to make payments not only in favor of mobile operators and other payees. Over time, the list of services will be extended with the operators of electricity, water, banks, public companies, trade organizations, etc. It will be automatically done without your participation. After connection of new Service Provider the button will automatically appear in the menu of the device.

Increasing sales through increasing the number of customers, involved in new service

You can increase sales by increasing the number of customers attracted by the new service. If you are the owner of the shop, you can save on the rent for the space for the terminal, since it is placed in its own retail space, and does not bear the costs of collection/maintenance jobs, as it may fulfill your employee.

Simplicity

The kiosks are relatively simple to operate and maintenance. No special skills are required. You just have 1-2 times to fill the paper and make cash collection. And do not forget to wipe the dust :)

Full monitoring

You can monitor all activity of the kiosk from the home with a simple computer or touchpad or smartphone connected to the Internet. Full statistics concerning payments, the amount of money you earn, the active unit are will be available for you. If necessary, you can also get statistics from the screen of the kiosks.

Maximum reporting, Statistics and analytics tools

Flexible manageability

After installing the devices you have flexible tools to change the service label on the screen, contact information including receipt printer, location coordinates, etc.

Regardless of geographic location

The devices can operate everywhere, in all the embers of the country, where the signal of the mobile operator is available.

Security

The system is closed and secure against unauthorized requests, attacks and fraud attempts. Agent accounts deposits can only be transferred to service provider accounts making it impossible to withdraw money from the system.
